Stuttgart - Science and Technology in an Island of Green

Mercedes-Benz, Porsche, Bosch and other global players helped create the reputation of the automotive city Stuttgart. Research and development from Stuttgart has an excellent standing all over the world. Stuttgart is one of Germany's most innovative and commercially successful regions – and also one of the greenest cities in Europe. The capital of the federal state of Baden-Württemberg is surrounded by vineyards and forests, has numerous parks and islands of greenery offering respite right in the city centre. Stuttgart also has plenty to offer in terms of cultural events. The city's internationally renowned ballet and opera, many small and large theatres and two well-known musical theatres invite visitors to a wide variety of programs.

Stuttgart Medical School

Institute for Education and Development

High-tech diagnostics, state-of-the-art therapy procedures, committed care

staffed by 6,000 specialists dedicated to a top-rate quality in medical and nursing care.

International Knowledge Transfer

The Stuttgart Medical School was established in August 2008 and offers a variety of further education programs for the international market.

A Centre for Education and Development

Within the Klinikum Stuttgart is our education centre which enables our clinical staff to enjoy the benefits of continuous education. The education centre offers many nursing, allied health and further education programs. Our Human Resource Development Department provides further training programs for all clinical staff.

Internationally, the German health system holds a leading position – and the Klinikum Stuttgart is one of Germany's largest modern hospitals. A broad range of medical services are offered by over 50 different departments which specialize in all aspects of medical care. Klinikum Stuttgart is a maximum-care hospital,
